DETAILED ACTION

1. This action is in response to the Request for Continued Examination (RCE) transmitted on 08/10/2010. After thorough search, application history, double patenting issues and in light of the prior art made of the record, claims 1-5, 8, 12-16 18, 19, 26, 28-37 are allowed.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 09/10/2010 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

The following is an examiner's statement of reasons for allowance: The closest prior art of the record US Patent No. 6,784,899, Barrus et al. discloses or suggests a system for receiving and creating multimedia messages includes an audio communication device, a visual output device, a remote access system and a multimedia message system. Barrus discloses a method that allows a user to remotely access multimedia messages. The method is performed using an object-indexing unit 306, which assigns an index number to objects of a multimedia message. For example, a first number is assigned to an object if the object is an audio message; another number is assigned if the object is document, and so on (see column 8, lines 12-52, col. 18, line 23- col. 19, line 19 with reference to Figures 11A and 11B). Takahashi et al. US Patent No. 5,819,261, teaches or suggests an information equipment comprising a schedule management means, a multimedia data file search means, and a search keyword extraction means for automatically extracting a keyword to be used in search processing by the multimedia file search means from schedule data managed by the schedule management means a user can search for a

required multimedia data file without re-inputting a word present on a schedule and can confirm the content of the search result file (see column 8, line 61- column 9, line 2). Furthermore, Shaw et al. US Patent No. 6,816,887 teaches or suggests method and apparatus for sending private message within a single electronic message (see at least abstract).

4. Along with other aspect of applicant's invention, limitations, "transmitting header information of a multimedia message from a user agent to a server, the multimedia message including first information and second information, the first information corresponding to the header information and the second information corresponding contents of the multimedia message, said contents including at least one of text or data, and wherein said transmitting includes transmitting the header information without the second information of the multimedia message," and "only header of a multimedia message when the index value is set to the second value, wherein the index value set to the second value indicates that the multimedia message was a previously sent multimedia message which has not changed," as claimed to perform the steps of claimed invention in independent claims 1, 8, 26 and 33 are not taught or suggest alone or in combination of Barrus, Takahashi and Shaw.

5. Some other art that is presented of the record but is not sane as inventors claimed invention is, Kuthyar et al, US Patent No. 5,768,513 which teaches or suggest a communication system uses web server to provide multimedia messaging functions over the internet the system look up director information stored to select and call the requested party based on the multimedia message information (see at least abstract and details associated with Figure 2).

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
